

Investor Presentation

February 2026

CAUTIONARY STATEMENTS

Cautionary Note Regarding Forward-Looking Information and Forward-Looking Statements

This presentation includes “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 and “forward-looking information” within the meaning of applicable securities laws relating to, among other things, the operations of Silvercorp Metals Inc. (“Silvercorp” or the “Company”), including statements about the anticipated benefits of the completed transaction between Silvercorp and Adventus Mining Corporation (“Adventus”); the possibility, timing and amount of estimated future production, costs of production, and reserve determination and reserve conversion rates, and statements with respect to the price of silver, gold, copper, lead and zinc; estimated mine life and any anticipated changes related thereto; estimates of revenues, operation costs, capital expenditures, mine plan, and estimated production from the Company’s mines; timing of receipt of permits and regulatory approvals; availability of funds from production to finance the Company’s operations; and access to and availability of funding for future construction, use of proceeds from any financing and development of the Company’s properties. Forward-looking information may in some cases be identified by words such as “will”, “anticipates”, “expects”, “intends” and similar expressions suggesting future events or future performance.

We caution that all forward-looking information is inherently subject to change and uncertainty and that actual results may differ materially from those expressed or implied by the forward-looking information. A number of risks, uncertainties and other factors could cause actual results and events to differ materially from those expressed or implied in the forward-looking information or could cause our current objectives, strategies and intentions to change including, without limitation, risks relating to: fluctuating commodity prices; calculation of resources, reserves and mineralization and precious and base metal recovery; interpretations and assumptions of mineral resource and mineral reserve estimates; exploration and development programs; feasibility and engineering reports; all necessary permits, licenses and regulatory approvals for our operations are received in a timely manner; title to properties; property interests; joint venture partners; acquisition of commercially mineable mineral rights; financing; recent market events and conditions; economic factors affecting the Company; timing, estimated amount, capital and operating expenditures and economic returns of future production; integration of acquisitions into the Company’s existing operations; competition; operations and political conditions; regulatory environment in China, Ecuador and Canada; our ability to comply with environmental, health and safety laws; environmental risks; foreign exchange rate fluctuations; insurance; risks and hazards of mining operations; key personnel; conflicts of interest; dependence on management; global economic and social impact of COVID-19; internal control over financial reporting; and bringing actions and enforcing judgments under U.S. securities laws.

This list is not exhaustive of the factors that may affect any of the Company’s forward-looking statements. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements of the Company or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors, including, without limitation, those referred to in the Company’s Annual Information Form under the heading “Risk Factors”. Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, described or intended. Accordingly, readers should not place undue reliance on forward-looking statements.

A comprehensive discussion of other risks that impact Silvercorp can also be found in its public reports and filings which are available under its profile at www.sedarplus.ca

Cautionary Note to U.S. Investors concerning estimates of Measured, Indicated and Inferred Resources

Silvercorp has prepared disclosure in accordance with Canadian reporting standards, which differ significantly from the current requirements of the U.S. Securities and Exchange Commission (the “SEC”) set out in Industry Guide 7. The terms “proven mineral reserve”, “probable mineral reserve” and “mineral reserves” used in this presentation are in reference to the mining terms defined in the Canadian Institute of Mining, Metallurgy and Petroleum Standards (the “CIM Standards”), which definitions have been adopted by National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”) and differ from the definitions in the SEC’s Industry Guide 7. “Reserves” under the CIM Standards may not qualify as reserves under Industry Guide 7. Under SEC Industry Guide 7, a mineral reserve is defined as a part of a mineral deposit, which could be economically and legally extracted or produced at the time the reserve determination is made. Accordingly, information contained in this presentation providing descriptions of our mineral deposits in accordance with NI 43-101 may not be comparable to similar information made public by other U.S. companies subject to the United States federal securities laws and the rules and regulations thereunder. In addition, the terms “mineral resource”, “measured mineral resource”, “indicated mineral resource” and “inferred mineral resource” are defined in the CIM Standards and are required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. “Inferred mineral resources” are part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Such geological evidence is sufficient to imply but not verify geological and grade or quality continuity. However, it is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource is economically or legally mineable. Disclosure of “contained ounces” in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute “reserves” by SEC standards as in place tonnage and grade without reference to unit measures.

Effective February 25, 2019, the SEC adopted new mining disclosure rules under subpart 1300 of Regulation S-K of the United States Securities Act of 1933, as amended (the “SEC Modernization Rules”), with compliance required for the first fiscal year beginning on or after January 1, 2021. The SEC Modernization Rules replace the historical property disclosure requirements included in SEC Industry Guide 7. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources”. In addition, the SEC has amended its definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” to be substantially similar to corresponding definitions under the CIM Standards. During the period leading up to the compliance date of the SEC Modernization Rules, information regarding minimal resources or reserves contained or referenced in this presentation may not be comparable to similar information made public by companies that report according to U.S. standards. While the SEC Modernization Rules are expected to be “substantially similar” to the CIM Standards, readers are cautioned that there are differences between the SEC Modernization Rules and the CIM Standards.

PROFITABLE SILVER MINES IN CHINA SUPPORT GROWTH AND DIVERSIFICATION

Proven Track Record

Production since 2006:	>100 Moz Silver + 1.5 Blb Lead + Zinc
Profits Generated:	>\$600M
Returned to Shareholders:	>\$235M
Cash ¹ + Investments ² :	\$382M + \$230M
ESG Rating:	MSCI A

Profitable Mines to Support Growth

1. Ying & GC operating mines in China
2. El Domo copper-gold mine under construction in Ecuador
3. Kuanping silver mine in construction in China
4. Tulkubash & Kyzyltash are development projects with ~6 Moz gold in Kyrgyzstan
5. Condor gold deposit under permit for exploration tunnels in Ecuador
6. BYP gold mine under permit in China

Best-In-Class Operations

- Produce ~7.5 Moz AgEq (Ag+Au) & ~90 Mlb Pb+Zn per year in China
- Trailing 12 months AISC¹ <\$14/oz
- Ying production increasing with mine optimization & Kuanping development
- Sizeable resource base supporting extension of Ying and GC's ~15-year reserve life

Diversified Growth Pipeline

- El Domo to add ~24 Mlb of Cu and ~26 koz of Au per year starting in 2027
- Tulkubash oxide set to enter construction, adding >100 koz/yr of Au
- Kyzyltash sulphide to dovetail with Tulkubash, adding >200 koz/yr of Au
- Condor provides further upside as a low-cost underground gold project

Compelling Value

- Peer leading margins, ROE and leverage to silver
- Trading at a discount to peers on multiple metrics, including a 0.7x P/NAV²
- Buy & Outperform Recommendations from most research analysts
- Highly liquid stock trading ~US\$90M daily across the U.S. and Canada³

SIGNIFICANT NEAR-TERM REVENUE GROWTH FROM COPPER AND GOLD

SILVERCORP METALS INC.

TSX: SVM | NYSE AMERICAN SVM

Note 1: Revenue for Current Mines are based on metal production from FY2026 production guidance and 2024 Ying and GC NI 43-101 reports, revenue for El Domo based on metal production from 2021 El Domo Feasibility Study, and using US\$5.00/lb copper, US\$3,350/oz gold, US\$1.15/lb zinc, US\$1.00/lb lead, and US\$50.00/oz silver metal prices

Note 2: El Domo gold and silver revenue adjusted for 50% gold stream and 75% silver stream to Wheaton

Note 3: Tulkubash is based on annual production of 100 koz of payable gold. Kyzyltash is based on annual production of 200 koz of payable gold

China Advantages:

- Close to customers (smelters) & suppliers
- Stable regulations
- Free profit distribution
- Home for 80% of global solar panel manufacturers, a main user of silver

China is the Centre for Manufacturing

- Nike 36% of shoe manufacturing
- Wal-Mart source for majority of goods
- BASF \$15B petrochemical complex
- Exxon Mobil \$10B complex
- Tesla Shanghai plant accounted for 51% of 2024 deliveries
- Apple over 90% of iPhone production

YING DISTRICT – GROWING THROUGH DRILLING, OPTIMIZATION, EXPANSION & CONSOLIDATION

SILVERCORP METALS INC.

TSX: SVM | NYSE AMERICAN SVM

Overview

- 7 mines feeding ores to 2 mills (4,000 tpd)
- Ag-Pb & Zn concentrates sold to local smelters
- **>15 year mine life benefited from extensive exploration drilling** – Drilled >2,600,000 m since inception with 250,000 m budgeted in FY2026

Mine Optimization to Grow Production

- Continue transition to more mechanized mining
 - \$25M in FY2026 to enhance ramp access
 - Trackless system (with LHDs) to replace shafts

Kuanping Mine Development (33 km north)

- Mine construction – \$4M allocated in FY2026
- Ramp development and exploration tunnelling underway

For further details please refer to Silvercorp's Q4 FY2025 MD&A and sections 4, 9 through 13 in the NI 43-101 Technical Report Update on the Ying Ag-Pb-Zn Property in Henan Province, People's Republic of China with the effective date July 16, 2024.

1800 TPD Flotation Line Added to Mill No. 2

TSF No. 3 Supports LOM Production and Beyond

EV Haul Truck Fleet

Kuanping Underground Development Underway

Strong Government Support

- December 2022: Investment protection agreement (IPA) for the **El Domo Copper-Gold project**
- May 2025: Amended IPA for SolGold's **Cascabel project**
- January 2026: IPA for the **Condor project**

Mining's Role in the Economy

- Created ~100,000 jobs and \$800M in tax revenue in 2023
- Mining exports (**Mirador + Lundin Gold**) went from \$275M in 2018 to \$3.3B in 2023
- Minerals now represent Ecuador's fourth largest export
- Government endorse mining as a key socioeconomic driver

EL DOMO COPPER-GOLD PROJECT: CONSTRUCTION IN PROGRESS

SILVERCORP METALS INC.

TSX: SVM | NYSE AMERICAN SVM

Ecuador's Next Mine

- Capex estimate of \$284M, \$45M spent through December 2025
- To be funded by cash on hand & \$175M stream payment from Wheaton (\$44M drawn)

Progress Update

- 2025 focused on site preparation: stripping overburden, road construction, archeological clearance, water management, and key infrastructure development (e.g., TSF)
- Refined flowsheet, Cu & Au recoveries improved by 5.4% & 6.2%. Long-lead equipment ordered
- Ore shed construction near completion
- Completed 600-personnel construction camp
- Awarding mining contract for mine construction and operation to CRCC 19
- **Commissioning of the mine and process plant targeted by July 2027**

2021 Feasibility Study Highlights

Mine Life	10 Years
Avg. Annual Payable Production (Years 1- 9)	24 Mlb Cu 26 koz Au 26 Mlb Zn 488 koz Ag 0.9 Mlb Pb
LOM AISC	\$1.26/lb CuEq

Project Economics (After-Tax)

Copper Price	\$3.50/lb
Gold Price	\$1,700/oz
NPV _{8%}	\$259M
IRR	32%
Payback Period	2.6 Years

EL DOMO COPPER-GOLD PROJECT: CONSTRUCTION ONGOING

Construction Camp in Service

Progress On The Northeast Water Channel

Ore Shed Construction

Pouring Concrete for Ore Shed Foundation

Building A Diversified Mid-Tier Producer With Multi-Million-Ounce Gold Projects

SILVERCORP METALS INC.

TSX: SVM | NYSE AMERICAN SVM

Transaction Overview

- \$162M cash deal, acquired a 70% interest in:
 - A 7 km² Mining Licence containing the Tulkubash (oxide) & Kyzyltash (sulphide) projects (~6 Moz combined)
 - A 27 km² Exploration Licence containing the Karator and Ishakuld gold zones
- Government will own a 30% free-carried interest
- Aligned interests from construction to production—creating a win-win outcome

Project Highlights

- 490 km by road southwest of Bishkek (2,100 m elevation)
- \$174M spent by the previous owner in drilling, metallurgy, technical studies, site infrastructure
- **Tulkubash:** permitted for construction and production. ~110 koz/yr gold for 3-4 years
- **Kyzyltash:** has a clear path for full permitting. ~190-230 koz/yr gold for 18 years

Phase 1: Tulkubash Oxide Development (2026-2028)

- 4 Mtpa open-pit heap leach operation mining **~500 koz** of oxide gold resource at recoveries of **74-76%**
- Producing **~110 koz/yr** gold in dore for ~3-4 yrs
- Committed to invest \$150M, with production start up in 2027-2028
- Based on 2018 BFS by Tetra Tech (JORC), expertized & localized for Kyrgyzstan by Ken Too in 2020, and improved in 2021 by LogiProc & Ausenco (JORC)
- Karator oxide zone could add 2-3 years of production

Phase 2: Kyzyltash Sulphide Development (2028-2031)

- 3-4 Mtpa open-pit/underground, flotation-BIOX-CIL operation mining **~5.5 Moz** of sulphide gold resource recoveries of **82-88%**
- Producing **190-230 koz/yr** gold in dore for ~18 yrs
- Estimated \$400M investment funded by cash flow from Tulkubash, with production start up in 2031
- Scope based on 2016 PFS by NERIN (Non-NI 43-101)

CONDOR GOLD PROJECT: SILVERCORP'S SECOND MINE IN ECUADOR

SILVERCORP METALS INC.

TSX: SVM | NYSE AMERICAN SVM

Project Overview

- Located in the productive Zamora Cu-Au belt
- 2025 PEA based on Camp & Los Cuyes deposits:
 - ✓ Indicated: 0.62 Moz Au @ 1.90 g/t
 - ✓ Inferred: 1.97 Moz Au @ 2.03 g/t
- 5,000 tpd underground mine producing Au-Ag dore + Pb & Zn concentrates
- Initial capex of \$292M based on vendor quotes

Condor Advantages

- Mineralization is at portal elevation, enabling direct access without having to ramp down
- Steeply dipping, continuous mineralization with one-third of ROM above the main haulage level
- Fair-to-good rock conditions & thin a saprolite cover, supporting the use of longhole stoping

2025 PEA Highlights

Mine Life	13 Years
Avg. Annual Payable Production (Years 1- 12)	113 koz Au 430 koz Ag
LOM AISC ¹	8.5 Mlb Zn+Pb \$1,258/oz

Project Economics (After-Tax)

Gold Price	\$2,600/oz
NPV _{5%} IRR	\$522M 29%
Payback Period	3 Years

1. All-in sustaining cost net of by-product credits.

Silver

US\$ Per Ounce

Lead

US\$ Per Pound

Zinc

US\$ Per Pound

*Net of value added tax

Shanghai Metal Exchange quoted prices on February 2, 2026: Silver=21.416 RMB/gram, lead=16,425 RMB/tonne, Zinc=25,070 RMB/tonne, all including 13% VAT. Conversion to net realized selling prices as follows:

Silver in US\$ = $21.416/1.13*31.1035/6.938*92.5\%=\78.59

Lead in US\$=(16,425–0 smelter deduction)/1.13/2204.62/6.938=\$0.95

Zinc in US\$=(25,070–3,500 smelter deduction)/1.13/2204.62/6.938=\$1.25

Silvercorp's extensive drilling & tunnelling

Benefits of drilling

- 1) Made new discoveries, including gold and gold-copper zones
- 2) Increased FY2026 production
- 3) Resource and reserve replacement in updated NI 43-101 MRE
- 4) Deferring mine development at greater depths, or even mining at shallower depths
- 5) Reducing amount of tunnel development and sustaining capital
- 6) Improving mine planning to boost productivity and reduce costs

GC Underground Mine

- 360,000 tonne ore per year to produce silver-lead, zinc, and minor tin concentrates since 2014
- XRT ore sorting system in commercial production
- Tailings are de-watered, then back-filled underground or dry-stacked

Updated MRE NI 43-101 (Aug 2024)

- P&P Reserve tonnes up 20% from the last Resource Estimate Report, despite 3.5 years mine production depletion
- M&I Resources up 11% and inferred resource up 17%
- Projected LOM has the potential to go beyond 2038

EL DOMO OVERVIEW: MINING TITLE AND INTEREST

1. Medium scale mining concession title for 25 years granted for Las Naves Concession containing the El Domo Project
2. Located 20 km from Pan-American highway and 3-hour drive from Guayaquil
3. Surface rights acquired for approximately 800 ha, including 100% of resource areas
4. Altius acquired a 2% NSR on El Domo for \$10 M in Jan 2019
5. Ecuador Government royalty: 4%
6. JV Structure –
 - I. Silvercorp funds 100% of the capital costs (excluding Wheaton Stream Financing) to production to receive 100% of first US\$30M free cash flows
 - II. Silvercorp Receives 95% of the free cash flow until all its equity contributions since October are repaid
 - III. Silvercorp Receives 75% free cash flow & Salazar 25%
 - IV. Income tax rate: 20%

CURIMINING MINE INFRASTRUCTURE

OPEN PIT MINE - 53 ha

5-stage descending banking system
666 ktpa (1850 tpd, 360 operating days per annum)
350 days, assuming 15 days of time lost to weather

- Bench height: 5 m in ore and 10 m in waste
- Ramp width: 15 m for ADT traffic and 14 m for 8x4 traffic
- Process Ramp-up: 1st Month: 6000 t, 2nd 28000 t

Saprolite Waste Dump – 30 ha

Capacity: 5 Mm³

- Saprolite and residual soil storage area
- Water filtration management system that leads to the collection pool for subsequent treatment
- The body of the dam will also store sterile rockfill material (WRF2).

Tailings Storage Facility – 20 ha

Total Capacity of tailings:
▪ Starter Dam (0,41 Mt) and final (6,75 Mt)

Dam height:
▪ Starter Dam: 50 m
▪ Final Dam: 115 m

Tailings Type

- Conventional: 55% solids, 45% water
- Seismic and Flood Criteria: 1:10,000-year earthquake or Maximum Credible Earthquake (MCE)
- Operating hydraulic free edge: 3 m
- Safety Factor: > 1,5 CDA2019

Process Plant – 6 ha

- Stockpiles
- Crushed ore Hoppers
- Ball Mill
- Flotation System
- Final Tailings
- Reagents and Storage Building
- Main Substation, power generation and fuel tank
- Plant Office, control room and Laboratory
- Blower House, etc.

Waste Rock Facility - 18 ha

Capacity: 2,70 Mm³

- Topsoil storage
- Material without economic interest from the mine.
- Temporary storage of hazardous and non-hazardous waste

EL DOMO COPPER-GOLD PROJECT CONSTRUCTION

1. 10 year open-pit strip ratio of 7:1,
2. Tailings storage design sufficient to fit open pit & underground development
3. Engineers: SLR/Roscoe Postle, Klohn Crippen Berger, DRA, Knight Piesold, Base Met Laboratories
4. Following metal recoveries in three concentrates:
 - a) Copper: 83.4% in Cu concentrate (7.5% in Lead Concentrate)
 - b) Gold: 51.8% (35.4% in Cu, 15.2% in Zn, 1.2% in Pb concentrates)
 - c) Silver 61.8% (31.9% in Cu, 24.3% in Zn, 5.7% in Pb concentrates)
 - d) Zinc: 83.1% (all in Zn concentrate)
 - e) Lead: 29.1% (all in Pb concentrate)

Preparing for production

- Lead-Zinc mine suspended August 2014
- 2024 NI 43-101 gold resource identified 456,000 oz M&I and 116,000 oz inferred
- Applied for a new gold mining permit

See Appendix pages 37 and 40 for notes and a detailed breakdown of BYP's Consolidated Measured, Indicated & Inferred Resources.

Tulkubash Mineral Resource Estimate in Pit constrained

Tulkubash 2025 In-house MRE (COG Au 0.21g/t) 40/80M					
Category	Tonnes (Mt)	Au Grade (g/t)	Ag Grade (g/t)	Contained Au (koz)	Contained Ag (koz)
Measured	7.35	1.61	1.38	380.5	327.0
Indicated	1.28	1.99	1.45	81.7	59.6
Total M+I	8.63	1.67	1.39	462.2	386.6

Notes: 1. The effective date of the resource is October 2025. 2. The qualified person (as defined in NI 43-101) for the purposes of the MRE is Lei Xue, P. Geo., Resource Geologist for the Company. 3. Grade estimation completed via Inverse Distance Weight method, within block model with a parent block size of 10 m x 10m x 10 m and minimal sub-blocking of 1m. 4. Mineral Resources are constrained by Resource shell defined as per \$1,800/oz price, applied variable recovery estimations and a cut-off grade 0.21 g/t Au. 5. The Mineral Resources are not Mineral Reserves and do not demonstrate economic viability. 6. Numbers may not sum due to rounding.

Kyzyltash Mineral Resource Estimate

Kyzyltash 2025 In-house MRE (COG AU 1.0g/t) 40/80m					
Category	Tonnes (Mt)	Au Grade (g/t)	Ag Grade (g/t)	Contained Au (Koz)	Contained Ag (Koz)
Measured	3.27	2.58	7.94	271.2	836.0
Indicated	47.04	2.43	8.96	3,670.7	13,548.8
Total M+I	50.31	2.44	8.89	3,941.9	14,384.8
Inferred	21.36	2.30	8.66	1,576.8	5,947.9

Notes: 1. The effective date of the reported Resource is October 2025. 2. The qualified person (as defined in NI 43-101) for the purposes of the MRE is Lei Xue, P. Geo., Resource Geologist for the Company. 3. Grade estimation completed via Inverse Distance Weight method, within block model with a parent block size of 10 m x 10 m x 10 m and minimal sub-blocking of 1m. 4. Applied cutoff grade of 1.0 g/t Au. 5. The Mineral Resources are not Mineral Reserves and do not demonstrate economic viability. 6. Numbers may not sum due to rounding.

Qualified Persons (Silvercorp)

The scientific and technical information **related to Silvercorp's projects** contained herein has been reviewed and approved by Guoliang Ma, P. Geo., who is a Qualified Person ("QP") within the meaning of National Instrument 43-101 – Standards Of Disclosure for Mineral Projects ("NI 43-101") who supervised the preparation of the scientific and technical information of Silvercorp included in this presentation. The Qualified Person has verified the information disclosed herein using standard verification processes, including the sampling, preparation, security and analytical procedures underlying such information, and is not aware of any significant risks and uncertainties or any limitations on the verification process that could be expected to affect the reliability or confidence in the information discussed herein.

For more information on Silvercorp's projects, readers should refer to Silvercorp's latest Annual Information Form dated June 22, 2022, and Silvercorp's technical reports available on SEDAR+ at www.sedarplus.ca.

The scientific and technical information related to Silvercorp's projects included in this investor presentation are derived from the following technical reports:

- The technical report titled "NI 43-101 Technical Report Update on the Ying Ag-Pb-Zn Property in Henan Province, People's Republic of China" dated August 28, 2024 with an effective date of July 16, 2024, which is filed on the Company's profile on SEDAR+.
- The technical report titled "Technical Report on the Gaocheng Silver-Lead-Zinc Project in Guangdong Province, People's Republic of China", dated July 20, 2024 with an effective date of June 30, 2024, which is filed on the Company's profile on SEDAR+.
- The technical report titled "Baiyunpu Gold-Lead-Zinc Project, Hunan Province, China, National Instrument 43-101 Mineral Resource Technical Report", dated effective June 30, 2024, which is filed on the Company's profile on SEDAR+.
- The technical report titled "NI 43-101 Technical Report, Feasibility Study, Curipamba El Domo Project, Central Ecuador" dated December 10, 2021 with an effective date of October 26, 2021, which is filed on Adventus' profile on SEDAR+.
- The news release titled "Silvercorp Announces Updated Mineral Resource Estimate for its Condor Project, located in the Zamora Chinchipe Province of Ecuador" dated May 12, 2025
- The technical report titled "Condor Project, NI 43-101 Technical Report on Preliminary Economic Assessment, Zamora-Chinchipe, Ecuador" dated effective July 28, 2021.
